RED LION MARQUEES

are proud to have become a hirer of Losberger structures following our recent investment in their top of the range marquees.

LOSBERGER MARQUEES

Losberger are the premier German tent maker who have developed tentage that is on a level above all others.

Totally level flooring, draught proof glazed walling, doors that shut perfectly and drum tight roofing make it a structure that we feel is the best available.

These structures have a flooring platform that is laser level, totally taking out the undulations of the site.

Covering is natural wood as pictured or carpet.

Glass walling can be fitted as required and is a dominant feature of the structure.

Ideal for viewing sporting events or admiring the landscape.

The glazing and doors are undoubtedly the most solid and best fitting of all marquee manufacturers.
